

The 11th annual Utah Wildfire Academy was a success, largely due to exceptional interagency cooperation between wildfire agencies and various fire departments throughout the State of Utah. The director of the Wildfire Academy would like to express appreciation to the organizations which participated in the 2011 Academy. This participation has been the foundation of a high-quality training opportunity for firefighters throughout the State of Utah and the Great Basin.

The director would also like to express thanks to the Incident Management Team and the many instructors for their dedication and support of this event. As always the team and instructors exhibited a high degree of professionalism and provided the upmost quality training experience to the students. We recognize the extra effort required by each person when they agree to serve at the academy. This dedication and enthusiasm results in the high-quality training we've come to expect from the academy each year.

Listed below are courses the academy is considering to offer at next year's Utah Wildfire Academy scheduled to be held May 14th-18th, 2011. Be aware that, as the evaluation of critical-need positions continues, additional courses may be offered or deleted.
